

# Elliott Yoon

elliottyon.github.io ◇ elliottyon@u.northwestern.edu

---

## Education

### Northwestern University

Evanston, IL (September 2021 - June 2025)

B.A. Mathematics (3.81 GPA)

- Teaching assistant for CS 339: Database Systems (Sp24, Fa24) & Math 220: Calculus (Fa22, Wi23, Fa23, Wi24)
- Relevant coursework:<sup>†</sup> Advanced Algorithms, Compilers, Database Systems, Data Structures & Algorithms, Memory-safe Transpilers Research, Operating Systems, Systems Programming, Web Development

---

## Employment

### Software Engineer Intern — *Java*

Washington, DC (June 2024 - August 2024)

Palantir Technologies

- Designed and implemented a low-latency algorithm to persist state updates in real-time distributed data systems, increasing the frequency of lossless data synchronization jobs in peered network meshes by 7200%.
- Built a parser to generate React component dependency graphs from Typescript monolith repositories; used to visualize and analyze graph properties of repository file structures for ease of navigation and refactoring.

---

## Projects

### RustyDB — *Rust*

(August 2024 - October 2024)

- Designed and built a relational database management system for pedantic use in CS 339 (Database Systems).
- Created internal SQL engine, planner, and optimizer for query execution with transactional concurrency control; built heap file storage engine to cache data persisted on disk to memory with a buffer pool manager.
- Stubbed out API implementations in select modules for students to complete; wrote project instruction docs.

### Compiler — *C++*

(January 2023 - March 2023)

- Generates x86 Intel Assembly from a C-based language. Used tiling methods for efficient instruction selection. Implemented liveness testing, graph coloring, and spilling algorithms for register allocation.

### 2048 Racer — *Go, React, Docker, Websockets*

(June 2022 - August 2022)

- Web application for players to race each other in real-time to beat the game 2048. Developed minimax backtracking algorithm with alpha-beta pruning against which users can compete. (It's successfully beat the game!)

---

## Languages

C/C++, Java,  $\text{\LaTeX}$ , Python, Rust, SQL, Typescript

## Accolades

Award for Excellence in Mathematics by a First Year Student

2024 ICPC Mid-Central Regional (3rd place); Qualified for 2024 ICPC NAC

---

<sup>†</sup>4.00 GPA
